

Steps to Follow for the Placement Exam and the YDMS-AGE

1. Make sure that your computer is up to date and any antivirus program installed on the computer deactivated.
2. At least two days before the exam, download and install the 3.1.1 version of Safe Exam Browser (SEB) to your computer (Windows 7, 8, 10 are supported, other platforms are NOT supported):
https://sourceforge.net/projects/seb/files/seb/SEB_3.1.1/SEB_3.1.1.250_SetupBundle.exe/download
3. Download the SEB config file at least two days before the exam:
<https://mega.nz/file/Qz53wYqZ#6fXf0nLr6id1qjtycytsxDNF4-ofBTHn9tiDoz8JI-4>
4. On the exam day, half an hour before your exam, go to your Perculus+ class. You can do so on your phone or a tablet. It is NOT possible to use Perculus+ on the computer that you will use to take the exam. Your phone or tablet must be positioned so that it can show you and the computer throughout the exam.
5. Before the exam, your teacher will read the exam rules and check your ID. When it is time, the teacher will tell you to start the exam. Before starting the exam, make sure that your camera is on.
6. When the exam date and time arrives, open the SEB config file. It will ask for a password: **aybusfl1**
In some cases, the config file does not pair with the application. In that case, by right-clicking on the config file, find the SEB application file (usually found at C:\Program Files\SafeExamBrowser\Application\SafeExamBrowser.exe). [Click here](#) for more details.
7. When you open the SEB config file and enter the password, the application will run and direct you to AYBUZEM login page. Log into your account to start the exam.
8. In the Placement Exam, there will not be any invigilation, but the exam will be taken on SEB.
9. It is crucial that you log in to AYBUZEM with SEB config file at least one day before the exam and take the mock exam on the exam course.
10. If you encounter an issue during the exam, please state it in your Perculus+ class.
11. If you encounter issues while installing Safe Exam Browser, please make sure that your computer is updated, and if the issue persists, please download the latest VC_Redist (C++ Redistributable) and .NET Framework applications:
